ABSTRACT

The important element of outcome-based education (OBE) is attainment of course outcome (CO) and program outcome (PO). Modified version of self-assessment report (SAR) by national board of accreditation (NBA) is the guidelines of this paper. NBA specified the OBE system in criterion 2,3 and 7. Specifically Criterion 2.6.2 emphasis the attainment of CO and PO. The sample measuring procedure done with all semester English pedagogical scores. Steps and procedure of attainment level and finding weak POs are addressed in this paper. In this assessment helps to find the weak POs and well-established POs mapping with course objectives. Based on the revised Blooms Taxonomy of educational objectives all the course outcome and program outcomes framed with its knowledge level. Education is the process of transferring knowledge, skill and content of subject oriented information. The traditional system lacking to measure the student's capacity. It concentrates only output based education. The twenty first century education system transferred in to the student's centric type of outcome-based evaluation. This would help to improve the course objectives towards outcome-based education and revise the curriculum development. This process of measuring not only consider the semester mark. It takes internal marks, practical marks, weightage of curricular and co-curricular activities, assignments and seminar grades and exit survey of program outcomes.

KEYWORDS: *Outcome based education; Self-assessment report; course outcome; program outcome*

INTRODUCTION

Every institution has its their own vision and mission which is the root cause for producing the qualified students. This would be helping to enhance the program offered in the institution. The program designed with expected outcomes and related to course outcomes. The present education system transferring from output-based education to outcome-based education. This kind of process introduced in the institutions through National Board of Accreditation (NBA). The criteria 2,3 and enforce the self-assessment report (SAR) based on the measuring of course outcome (CO) and Program outcome (PO).

Teacher education program mainly focus pedagogical subjects. In this paper pedagogy of English course in all semesters taken for measuring the sample attainment level of students. The co and po framed by the concerned faulty using the action verb based on revised Blooms Taxonomy. Here the Course Attainment Level (CAL) fixed in 3 (above 60%) as highest level.

MEASURING STEPS

1. Constructing program outcomes based on the standardized format of NBA.
2. Framing Course outcome with reference of Blooms Taxonomy “K” level.
3. Preparation of Co and Po mapping Matrix.
4. Finding the average of all COs mapping with Pos.
5. Calculating the course attainment level.
6. Finding program outcome attainment level.
7. Exit survey from the coursed completed students for indirect PO attainment.
8. Setting the Target of all PO attainment.

SAMPLE TABLES AND CREDITS

Here the university grades and continuous assessment marks given an example from VISTAS, School of education, B.Ed., Program (2016-18). For the sample calculation English Pedagogy marks of all the four semesters and two practical examination marks were taken. The course code and course name present over here in the format of VISTAS deemed to be university, Chennai. Table 1.1 to 1.6 represents the course outcomes of each semester. Table 2.1 to 2.6 represents the CO and PO mapping matrix. Table 3 contains the average of Program level Course objective - PO Matrix for all the courses. Table 4.1 to 4.4 sows the course outcome attainment level. All the student’s practical attainment is above 60%. So, the highest attainment 3 has taken as default. Table 5 contains the program attainment value.

- hypothecated value

* - Assumed Value

MEASURING PROCEDURE:

- CO- PO mapping Matrix and attainment values are computed as shown in Table II.
- Average of all course hypothecated values presented in Table III.
- The overall course attainment levels of all courses computed in Table IV.

- The PO values presented in the cells Table V is corresponding cell value from Table 3 X Overall COAL / highest COAL 3. The average of all PO present in cells of Table V is direct PO attainment. Exit survey average of PO value is indirect PO attainment.
- Finally, the Overall PO attainment computed by adding the direct and indirect PO ratio 80:20 respectively.

CONCLUSION:

The credential of English pedagogy courses in B.Ed program has taken for this measurement process. The students achieved in targeted level. The weak program outcomes are PO4 and PO7. These POs will be revised in upcoming curriculum frame. This evaluation process is useful for further improvement in curriculum and teaching learning process. The analysis of PO values will help to revise the syllabus and enhance the course objectives.
